## Products - TEK-TROL®

### Product Data

---

TEK-TROL® is a virucidal, bactericidal, fungicidal, oocysticidal and sporicidal disinfecting compound composed of the association of synthetic phenolic groups, widely used in production and veterinary industry and available in packages of 1 and 5 liters.

Formulated synthetic phenol based product.

High residual power.

Efficiency even in presence of organic matter.

Good actuation both in acidic and alkaline environments.

### How to use

#### Heavy Breeder Farms

Cleaning: apply DETER SELL-CB® in the dilution of 1:300, allow it to act for 20 minutes and then rinse.

1st Disinfection: apply in dry facilities AVT-450® in the dilution of 1:500.

2nd Disinfection: apply in dry facilities TEK-TROL® in the dilution of 1:250.

3rd Disinfection: Spray in the environment, with the assembled equipment TEK-TROL® in the dilution of 1:250.

#### Broiler Farms and Layer Houses

---

Cleaning: apply AVT-40® in the dilution of 1:500 using pressurized water (it does not need rinsing).

1st Disinfection: apply in dry facilities AVT-450® in the dilution of 1:1000. In case of high challenges

apply AVT-450® in the dilution of 1:500.

2nd Disinfection: apply in dry facilities AVT-450® in the dilution of 1:1000. In case of high challenges

apply TEK-TROL® in the dilution of 1:250.

#### Pig Farms

##### Maternity / nursery

Cleaning: apply DETER SELL-CB® in the dilution of 1:300, allow it to act for 20 minutes then rinse.

1st Disinfection: apply in the dry facilities TEK-TROL® in the dilution of 1:250.

2nd Disinfection: apply in the dry facilities TEK-TROL® in the dilution of 1:250 one day prior to entry of the female in the maternity and/or of the suckling pigs in the nursery

. In case of challenges with *Isospora suis*, perform application with TEK-TROL® in the dilution of 1:100, in low parts of the maternity (floors, walls, creep), on the 3rd and 10th days, after birth of the suckling pigs. The same dilution should be used on the 7th day after lodging of the suckling pigs in the nursery.

##### Fattening / termination / gestation

---

Cleaning: apply DETER SELL-CB® in the dilution of 1:300, allow it to act for 20 minutes then rinse.

Disinfection: apply in the dry facilities AVT-450® in the dilution of 1:1000.
